

Course Goal

To assist communities and industry to prevent and deter criminal and terrorist acts that target the agriculture and food sectors.

What Will You Learn?

- How to assess vulnerabilities of agriculture and food facilities on a community wide basis
- How to assess vulnerabilities at the single facility level
- How to harden targets, including implementation of biosecurity and facility security programs

Course Delivery

- 2½ days delivered in your local community

Target Audience

- Federal, State, County, and Local Officials
- Emergency Management
- Public Health
- Agriculture and Food Industry
- Veterinarians
- Extension and Crop Specialist
- Law enforcement and Military

Program Overview

This program introduces assessment methodologies that can be used to evaluate vulnerabilities in agriculture and food systems as well as for individual facility analysis.

The training program is designed to stimulate learning by including hands-on training that incorporates video of actual facilities. Case studies and practical exercises are emphasized. Participants can choose from exercises in crops, animal facilities, and food processing.

Training Program Cost

- Instructional team, equipment and all materials are provided at no cost.
- Local community must provide suitable facility for program delivery.

New Initiatives:

- Offer two new DHS certified 1 ½ day courses focused on food processing
- Developed from MGT:332 certified program
- Available by the end of November 2008
